## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05 January 2005 has been entered.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 142 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 26 of U.S. Patent No. 6,389,569. Although the conflicting claims are not identical, they are not patentably distinct from

Art Unit: 2616

each other because the difference between claim 142 of the present application and claim 26 of U.S. Patent No. 6,389,569 is that claim 142 of the present application recites a **method** of recording a real time file and recording/ reproducing information for ensuring the real time reproduction of the real time file on a medium and claim 26 of U.S. Patent No. 6,389,569 recites a medium stored with a real time file and recording/reproducing information. However, it is obvious to one of ordinary skill in the art to modify claim 26 of U.S. Patent No. 6,389,569 by using a method that produce the medium of claim 26 to produce claim 142 since the medium of claim 26 of U.S. Patent No. 6,389,569 is a product of a process (method).

Regarding claims 149- 151 and 153, it is obvious to one of ordinary skill in the art to using a step of reproducing the real time file and recording/ reproducing information from the medium of claim 26 of U.S. Patent No. 6,389,569 produce claims 149 – 151.

***Allowable Subject Matter***

4. Claims 155-164 allowed.
5. Claims 152, 154 and 15-174 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.
